

Energy Efficiency Savings Can Pay for Your COVID-19 Building Upgrades

Pandemic-proofing the workplace requires putting hygiene at the core, reshaping working patterns and implementing **expensive design upgrades**.

The Strategy

Energy Advisors bundles energy efficiency improvements with COVID-19 upgrades. The resulting efficiency savings are paid towards the upgrades all under a single Service Agreement.

No Upfront Capital required. We fund all improvements upfront and use savings to pay for the upgrades.

Net Operating Income & Cash Flow Boost enabled by energy savings, solar production and reduced operating expenses.

Deferred Maintenance can typically be paid for by efficiency savings.

Efficiency as a Service (EaaS)

An evolution of Software as a Service (SaaS)-
A client purchases a subscription from a central software host.

More economical than a Power Purchase Agreement (PPA)-
A client purchases solar power at a set price from a solar provider.
